

Diwash Regmi

Full stack developer

Phone: +977 9867147599

Email: diwashregmi24@gmail.com

Summary

Motivated Computer Science student and full-stack web developer seeking an internship, with a strong willingness to learn and grow. Passionate about solving real-world problems and continuously learning new technologies.

Technical Skills

Languages and Scripts: JavaScript, HTML5, CSS3

Frameworks and Libraries: React.js, Node.js, Express.js, Tailwind CSS, JWT Auth.

Database: MongoDB, Supabase

Tools: Git, GitHub, Postman

Projects

LifeLine: A location-based blood donation platform connecting donors with recipients through real-time proximity filtering, geolocation matching, and centralized admin management.

Recipe Manager: A full-stack MERN application for discovering, creating, and planning meals with recipe management, secure user authentication, and real-time meal planning.

Portfolio v2: A modern, high-performance portfolio website engineered with Next.js 16 and Tailwind CSS v4, featuring a minimalist glassmorphism interface, fluid animations, and a fully functional contact system.
